## News release

### **Composites One to Exhibit at 2010 China Composites Expo**

*Three Day Event to be Held in Beijing, China*

---

**Arlington Heights, IL, August 31, 2010...**Composites One announced today that Composites One China will be an exhibitor at China Composites Expo in Beijing, China. The International Composites Industrial Technical Expo, now in its 16<sup>th</sup> year, will be held, September 15-17 at the China National Convention Center.

“We have found the China Composites Expo to be the best place for us to introduce new products and process technologies and also to meet with both existing and new customers to better understand their requirements and how we can help them to improve the products they manufacture.” said Don Hairhoger, President of Composites One China. “As this is our fourth year exhibiting at the China Composites Expo and we hope to continue to build upon the Composites One brand as the one resource for manufacturers, offering the highest quality products and technical support.”

This year Composites One will also conduct a live closed mold demonstration in its exhibit at the expo. The demonstration will feature the Light Resin Transfer Molding (LRTM) Process and will be presented by Composites One, along with assistance from Magnum Venus Plastech and industry renowned closed mold expert Charles Tur. The demonstrations will be held on September 15 and 16 at 1:30 P.M.

“We are seeing the LRTM process now being accepted by the China open mold manufactures as an affordable option to convert to a process that produces better quality parts with good surface appearance, reduced labor costs, and gives better overall control of

the cost of materials ” said Philip Condron, General Manager Composites One China.

“Composites One is now becoming known as the leader in closed mold technologies for the China Composites Industry”

In addition, several suppliers have partnered with Composites One to exhibit at the expo. Those suppliers include: Acrastrip, AGY, ATC, Chomarat, Cray Valley, I-Core, Magnum Venus Plastech, Specialty Products, and Syrgis Initiators. Visitors to the expo can stop by the Composites One booth #1428/1430/1529 and visit with these suppliers to discuss their new products, latest technologies and technical solutions.

Globally headquartered in Arlington Heights, IL, Composites One is the nation's leading distributor of composite materials serving customers from 30 distribution centers in North America. Composites One China is headquartered in Shanghai, China. Composites One offer composites fabricators and molders thousands of products from the industry's top suppliers through a technical sales and customer service force that is the most knowledgeable in the industry. The company offers a variety of value added services that include closed mold technologies and technical applications reviews.
