APPLICATIONS ON PRIMED AND  
PAINTED PARTS, COMPOSITES, MARINE  
GEL COAT, WOOD FURNITURE AND  
NON-FERROUS METALS.***

## Reduce Finishing Cost with the Fastest Cutting, Longest Life DA Sanding Disc

The combination of Norton SG seeded-gel and premium heat-treated grains provides the most aggressive yet coolest cut, with maximum resistance to dulling. This results in higher cut rates and extended life – as much as 2:1 vs. conventional designs. The water-based stearate No-Fil coating provides maximum load resistance, extending life even more. Operators do more with each disc in less time and downtime changing spent discs is minimized.

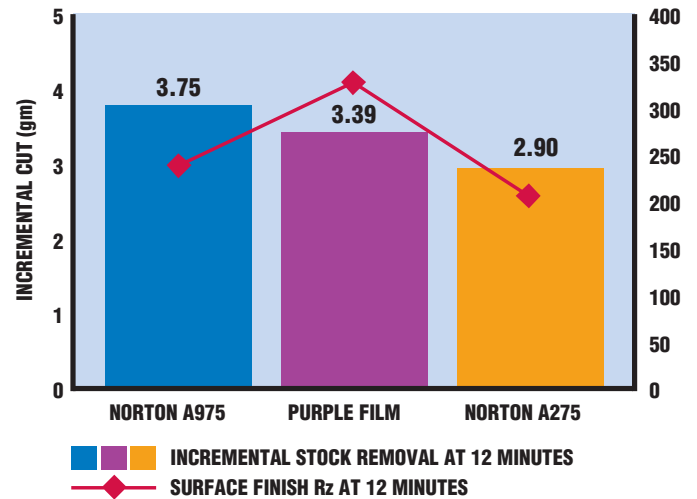

**DA GRINDING ON ACRYLIC PANELS**  
 5" DISC  
 10 LB. LOAD, 12,000 OPM  
 P80 A975 NO-FIL SG, PSA

## Achieve More Consistent Finishes

The use of P-graded abrasive achieves a more consistent, uniform scratch pattern allowing us to maintain an acceptable surface finish even at the higher cut rates of A975, unlike the competitive purple design where surface finish deteriorates significantly. The fiber reinforced B-wt. latex saturated paper provides a 50% - 60% improvement in tear strength while maintaining flexibility, allowing direct competition with competitive film designs.

**DA GRINDING ON ACRYLIC PANELS**  
 5" DISC  
 10 LB. LOAD, 12000 OPM  
 P180 A975 NO-FIL SG, PSA

### FEATURES

- Patented Norton SG ceramic aluminum oxide abrasive, P-graded
- Unique fiber-reinforced, B-weight latex-saturated backing
- Water-based stearate, non-pigmented, No-Fil coating

### BENEFITS

- Fastest cut rate; longest life
- Consistent finish
- 50-60% improvement in tear strength
- Flexible; can be used wet
- Provides maximum load resistance and extended life; no color transfer to work

**NORTON**

## Gun Safe Manufacturer – Utah

- Tested P320 A975 6" Speed-Grip vs. competitive purple film and A275 on epoxy primer using a 6" random orbital sander. Tests were engineering supervised by their process team.
- A975 performance was 215% of A275 with 1787 sq. in. of area sanded vs. 830 sq. in. for A275, and 235% of competitive purple film, which only sanded 762 sq. in. Performance was verified on subsequent tests.
- Although A975 is premium priced, it had the lowest cost per sq. in. at only 53% of the cost of the next closest competitor.

## Woodworking Account – Pennsylvania

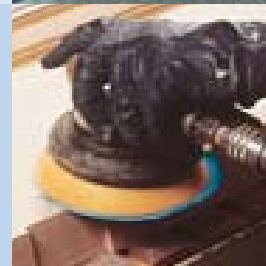

- Tested P180 A975 5" Speed-Grip vs. competitive ceramic film, where we had previously lost business vs. A275.
- A975 equaled competitive ceramic film performance DA sanding hard maple and cherry cabinet doors with measurably better surface finish.
- Customer also preferred Norton Speed-Grip vs. competitive hook-backed disc due to pliability.

## Woodworking Account – North Carolina

- Tested P180 A975 5" Speed-Grip vs. A275 PSA.
- A975 was 400% of A275 performance DA sanding soft maple assembled cases and entertainment center panel doors. Two separate operators tested with the same results.
- Finish was reported to be at least equal.

## Auto Assembly Plant – Tennessee

- Tested P80 A975 5" Speed-Grip vs. competitive ceramic E-wt. paper using a DA sander on aluminum hoods.
- A975 sanded an equal area with excellent cut rate and better finish than the competitive product with the additional benefit of no loading.

# NORTON SG A975 NO-FIL SANDING DISCS AND ROLLS

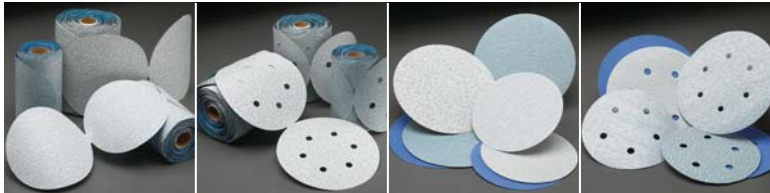

## Availability

A975 is now available from stock in 5" and 6" Stick and Sand disc rolls and Speed-Grip discs in the extended grit range including P80 - P180, P220 - P320, P400, plus 2-3/4" PSA rolls. Inventory is in place for immediate delivery. Packaging is 100 discs/roll, 4 rolls per case for Stick and Sand disc rolls, 50 discs/box, 200 discs/case for Speed-Grip discs and 5 rolls per case for PSA rolls. Contact your Norton Distributor for the complete stock availability.
